The art of outdoor living

RANGE OF RETRACTABLE
PERGOLAS

ATIKA

Maximum comfort and convenience for your outdoor space

With the best performance

At HABITAT LLAZA we are constantly evolving, developing continuous improvements to all our products. As a result of this work, we can now present the new generation of ATIKA retractable pergolas — a perfect solution for outdoor living. The ATIKA range can be enjoyed all year round and at any time of the day, providing protection, comfort, robustness and easy maintenance.

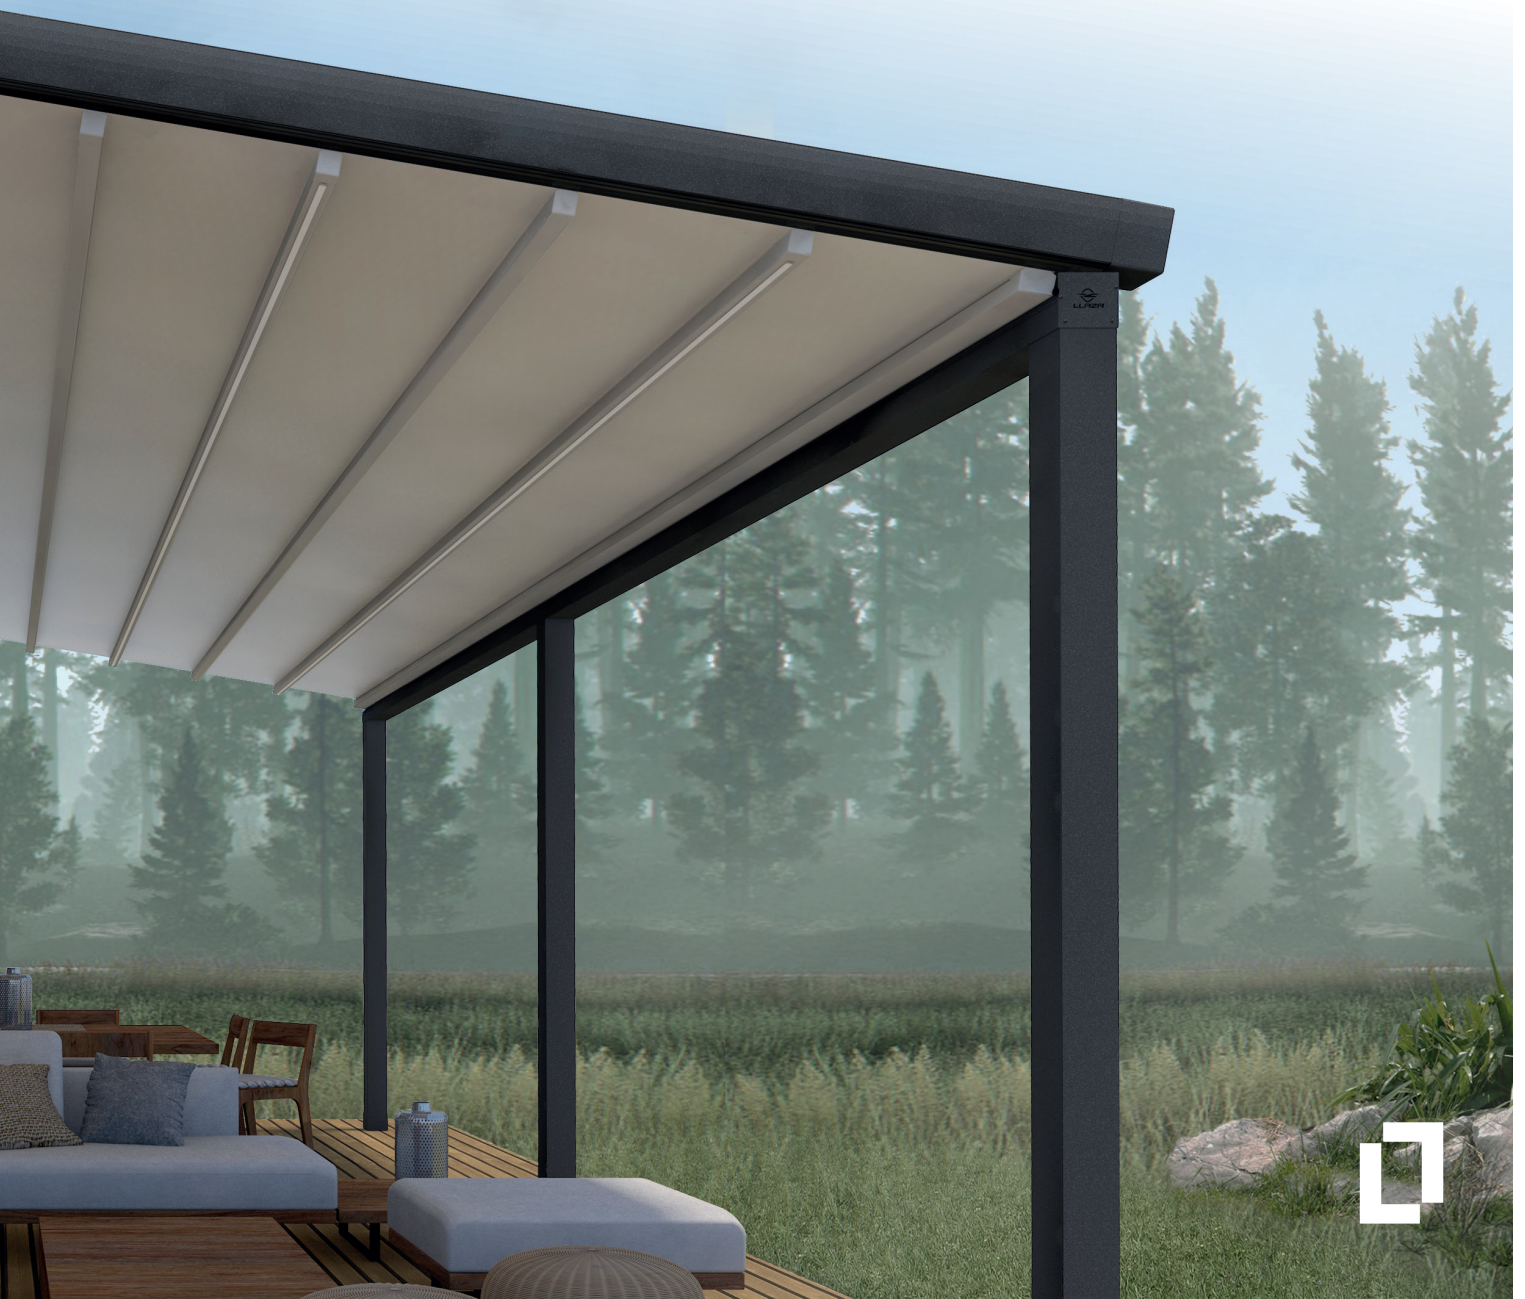

ATIKA pergolas are ideal for homes as well as for bar and restaurant terraces. They expand the living space, adding more square metres of comfort for families and customers of HORECA establishments.

Why choose the ATIKA retractable pergola?

High-tech

- Adjustable feet allow the pergola to be levelled on the ground, saving time and additional adjustment operations.
- Greater versatility and optimisation of profiles.
- Concealed guide brackets, providing a high-quality finish.
- Greater flexibility and ease of operation in aligning the guide runners.
- Rainwater drainage at the front and side pillars.
- Maximum optimisation of weight and performance with new fabric-holder profile.
- LED lighting along the entire length of the profile.
- Large modules with a width of up to 5 m and a projection of up to 7.5 m.
- New cellular polycarbonate weather cover profile for improved aesthetics and noise reduction

Why choose the ATIKA retractable pergola?

Highly resistant

The ATIKA range of retractable pergolas is made of high-strength aluminium and steel.

Complemented with RECASENS fabric for the roof, it offers the best combination against the weather and the passage of time.

Reinforced 150 mm rails and 120 x 3 mm pillars give it a solid and elegant look.

Design

Straight lines that connect with urban spaces and minimalist architectural styles.

HABITAT LLAZA's ATIKA pergolas are designed to be integrated into all types of outdoor spaces.

Performance

The integrated LED system illuminates the entire length of the roof profile, creating well-lit and comfortable spaces 24 hours a day.

Adaptability

The ATIKA range of retractable pergolas is ideal for private outdoor spaces as well as bars and restaurants, thanks to its great adaptability, external insulation and modularity, allowing you to create spaces as large as you wish.

The maximum sizes obtainable with each module is a 5 m width with a 7.5 m projection

Why choose the ATIKA retractable pergola?

Intelligent motorisation

The ATIKA range of retractable pergolas is all about convenience. Motorisation in the cover is fitted as standard, allowing effortless opening and closing to suit users' preferences.

Textile finish

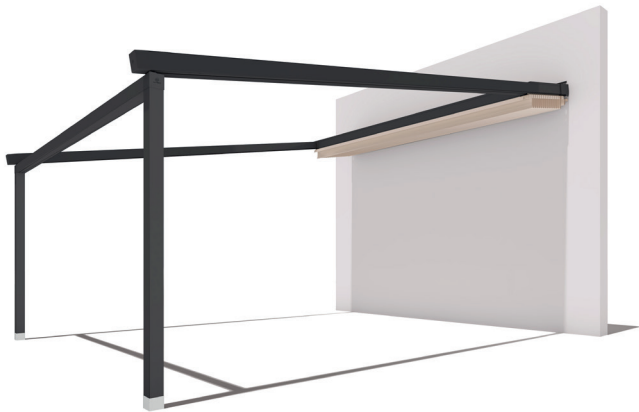

Among all the production options for the retractable cover of the ATIKA range, the stand-out feature is its compatibility with RECASENS Recacril® PROOF fabrics, which offers total waterproofing without sacrificing the warmth and beauty of the textile finish.

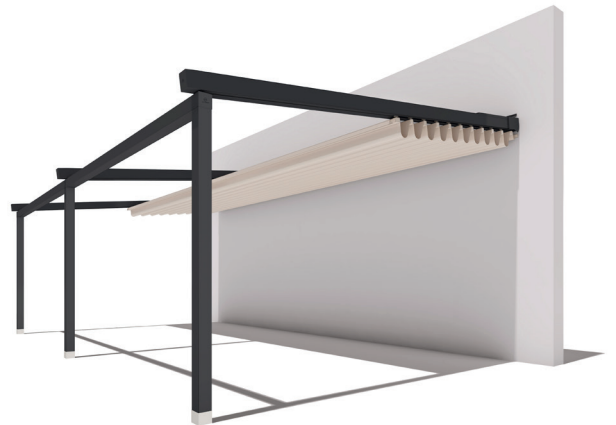

The ATIKA pergola adapts to your needs

Wall to front portal with 2 pillars Wall to front portal with 3 pillars

Example with 5.00 m width and 7.5 m projection.

Example with 8.5 m width and 5.2 m projection.

Wall to front portal with 3 pillars

Example with 9.85 m width and 7.5 m projection.

For other applications: between-walls, self-supporting, etc., please consult us.
